

ENVIRONMENTAL OBJECTIVES for the year 2011

1. Atmosphere quality improvement in the new extension of sand foundry.

Responsible person: Operation Manager

2. Do not exceed amount of emissions in the atmosphere (total amount from all sources, grams of substance per one tonne of melted alloy):
 - TZL 130
 - NO_x 70
 - CO 120

Responsible person: Ecologist

3. Do not exceed a production of hazardous wastes (kilograms of waste per one tonne of melted alloy):
 - 120109 waste cutting emulsion 1.5
 - 120116 waste material from blasting 3.5

Responsible person: Waste Manager

4. Do not exceed consumption (kWh, possibly m³ per one tonne of melted alloy):
 - of electricity 1150
 - of natural gas 400

Responsible person: Energy Manager
